**Management software**  
Job Hazard Analysis

# COMPREHENSIVE PREVENTIVE TEST ANALYSIS TO AVOID THE WORST

JOBARIX, our preventive analysis software enables you to analyze every risk in relation to a task, a piece of equipment or a workstation. Designed step by step, this analysis will allow the identification of every danger and hazard, implement control measures and reduce risks for the affected workers. This simple, intuitive system is easy to use, so you can concentrate your efforts on increasing performance. With one efficient tool you have a sound, centralized, document management system. Look no further, JOBARIX translates into **Simplicity, Efficiency and Ingenuity!**

A man with dark hair and safety glasses is focused on his work. He is wearing a blue long-sleeved shirt and is positioned in front of a piece of industrial machinery, possibly a lathe or mill. The background is slightly blurred, showing an industrial setting.

By purchasing this job hazard analysis management software, you will be able to solve a multitude of problems that face you on a daily basis. Over 900 work accident deaths are reported every year. Of these, investigations show that over half could have been avoided through task analysis and proper preventive measures. With a software in place that allows you to do this, you can organize and centralize each analysis to always get the same perfect result.

---

## PROBLEMS THAT CAN BE REMEDIED THROUGH JOBARIX

---

- No prior knowledge of risks related to the workplace
  - High number of accidents
  - No management system currently in place
  - Too many printed analyses
  - Non standardized prevention reports and analysis
  - Outdated work procedures
  - High number of dedicated resources
  - Non compliant to various regulations and laws
  - Lack of priorities for prevention
  - Efforts are not concentrated in the right areas
  - Difficulty with hazard identification
  - No centralized reports
  - Inadequate innovation for work methods and procedures
  - Inability to properly identify risk priority
  - Insufficient control of permanent or temporary corrective measures
  - And many more...
-

# ESSENTIAL CHARACTERISTICS

## 01 DIFFERENT TYPES OF ANALYSIS

For any field of work, you can perform analysis on a piece of equipment, a workstation, a sequence of tasks or any other element that represents a danger.

## 02 CONSIDERABLE REDUCTION IN RISKS

Accurately portrays the causes of different hazards to better define and review your work procedures and establish control measures that will limit the exposure.

## 03 ANALYSIS DESIGNED STEP BY STEP

Break down your analysis in steps for better understanding. Choose the task and the software will break it down into easy-to-use structures that allow you to clearly define the hazards and take preventive measures.

#### 04 | **LIST YOUR DANGERS**

Get access to a comprehensive module listing all the hazards in your business, in addition to your training modules and documentation related to preventive analysis.

#### 05 | **DEDICATED EQUIPMENT MODULE**

You can find all the equipment, the places where they are used, their frequency of use as well as the prescribed types of inspection for each, along with their limitations and safety devices. It's also possible to attach the required manuals for safe operations.

#### 06 | **REAL-TIME STATISTICS**

Display 'flash' indicators to compare the initial risks against residual risks that remain after the implementation of control measures and have comprehensive graphics and statistics to support that data.

## 07 CONTROL MEASURE MANAGEMENT

Flawlessly keep track of your control measures and safety devices which you have put in place to reduce risks. You can then easily identify the most effective operations.

## 08 COMPLETE RESEARCH MODULE

Quickly and effectively answer all your questions. Develop your action plan by identifying departments, positions or your riskiest workplaces and concentrate your efforts where they are needed most.

## 09 VISUALLY IMPECCABLE END RESULTS

Have on hand detailed information concerning your preventive analysis, as well as graphics and statistics required by your work environment. Print, export or send by email directly from within the application.

## AN INVESTMENT THAT PAYS BIG!

Just having a software like JOBARIX enables innovations in your work procedures. By performing every required task in specific ways to avoid injuries and occupational diseases, JOBARIX allows you to focus your efforts where they are needed to bring down the number of accidents in the workplace and provide more profitable productivity. Are you aware that to cover an accident that is priced at 500\$ in direct costs, you will end up paying approximately 10,000\$ in indirect costs? How many products will you have to sell to cover these expenses?

---

## THE ADVANTAGES OF JOBARIX

- Take immediate actions
- Exercise your due diligence
- Identify risks and dangers
- Prevent injuries related to work procedures
- Develop new and adapted work methods
- Obtain recognition from the professional environment
- Put efficient control measures in place
- Prioritize efforts in the appropriate places
- Considerably reduce the number of incidents
- Promote preventive actions
- Easily analyze productivity
- Determine the most efficient actions
- Surpass safety regulations and requirements
- Immediately access your reports in a centralized area

# ON THE CUTTING EDGE OF TECHNOLOGY

## **SOFTWARE AS A SERVICE**

Maerix offers software as an annual web rental which requires no purchase or installation of computer equipment on your part. This enables businesses of all shapes and sizes to get fast access to our solutions.

## **THE SECURITY OF YOUR DATA**

Maerix takes care of everything related to preservation and maintenance. We have elaborate monitoring systems to ensure continuity of service. We also have redundancy systems at every level, which in turn improves the reliability and recovery of your data.

## **DATA ARCHIVES**

When you acquire one of Maerix's software, you will still have access to the historical data that you have accumulated over the years. This way, you can easily gain access to statistics showing you, amongst other things, the big picture in terms of HSE.

## **INTER-SYSTEM CONNECTIVITY**

We put at your disposal connectivity APIs designed to communicate with any management tools already in place in your organization (when applicable). Our software can then become an addition to your planning ("ERP") such as SAP, PeopleSoft, Oracle, Taleo, Microsoft Dynamics, etc.

## PROGRAMMING LANGUAGE

Conceived by our team, our software are built from the best programming languages of the day, such as SQL, PHP, HTML and CSS. It allows us to have the most performant applications, as well as the most visually impeccable on the market.

## TECHNICAL REQUIREMENTS

To have access to our software, all you need is an internet connection and a browser. Our solutions are optimized for the latest version of all browsers such as: Internet Explorer (9 and later), Chrome, Firefox and Safari.

## FRAMEWORK

By designing and creating our software from beginning to end, Maerix is not restricted by a conceptual online purchased model (or template). Our programmers develop all the necessary code, from A to Z, for the deployment of our solutions. With all this, we can satisfy all your requirements using the latest technologies available on the market. Nothing can stop us!

# AN UNPARALLELED CUSTOMER SERVICE

**EMERGENCY SERVICE SUPPORT** Maerix offers a multilingual 24 hours, 7 days a week, 365 days a year support platform. If you have an unusual schedule, or any of your business units are on a different time zone, this service is for you.

**AVAILABLE TRAINING** Although our software is incredibly easy to use, we offer several types of training: administrative, supervision, users and upgrade. Our courses are given in your offices, ours or online, as needed.

**SMOOTH AND HARMONIOUS TRANSITION** Whether you currently use a spreadsheet or an outdated system that no longer meets your needs, the transition to our solutions is easy and seamless! You will be operational with your all-new database in no time.

**ADVISORY SERVICES** To reduce resistance to change, and adapt to each and everyone's computer skills, Maerix also offers an advisory service. This service allows you to adapt training to small workgroups and make use of the software effectively in the context of your work environment, with direct relation to the everyday tasks of your participants. Our team of trainers will move within your organization as needed.

# **YOUR SEARCH ENDS HERE... ALL YOU NEED TO DO IS SAY YES!**

In conclusion, JOBARIX is a job hazards analysis management software, designed to enable you to benefit from a standardized and visually flawless reports, increasing both efficiency and performance. Forget about managing everything on paper and concentrate on avoiding fatal accidents that could cost you thousands of dollars.

As you can see, Maerix's multi-dimensional software answers all your needs. The next step is to give your approval to start implementation. Being simple, efficient and resourcefully ingenious, we will accompany you at every step. We're ready to help you enjoy the best management software, to enable you to increase your efficiency and performance as quickly as possible.
