

**Management software**

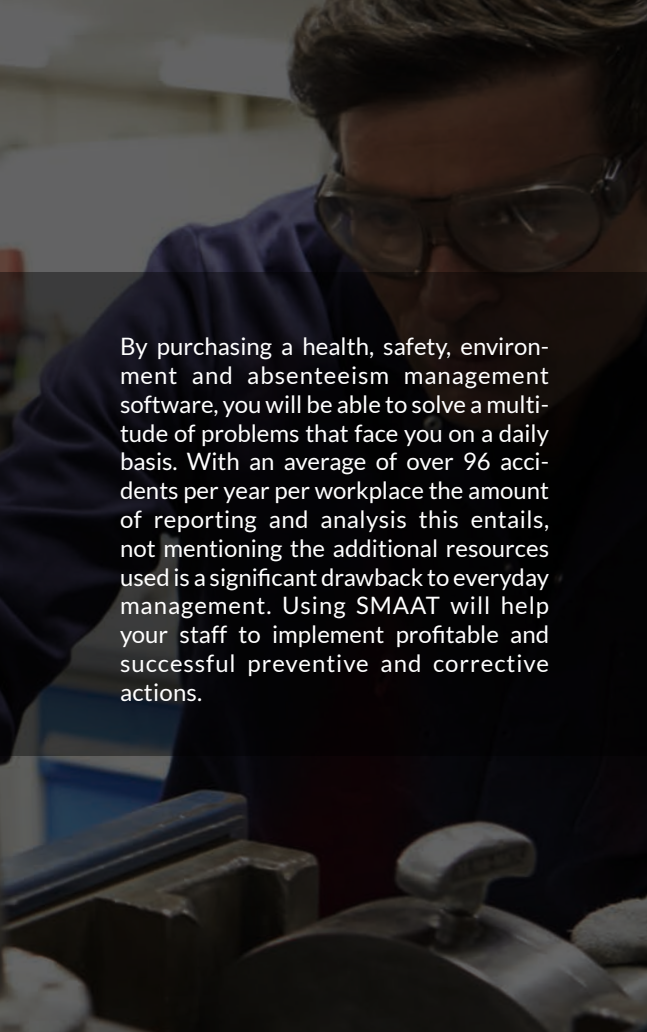

Health • Safety • Environment • Absenteeism

The background image shows two male workers in a factory or workshop. They are wearing red long-sleeved shirts. The worker on the left is older, with grey hair, and is wearing safety glasses and yellow gloves, working on a metal part with a tool. The worker on the right is younger, also wearing safety glasses, and is holding a metal part. The foreground is filled with various metal components and tools, slightly out of focus. A semi-transparent dark grey box contains the text.

# REACH YOUR “ZERO ACCIDENT” TARGET BY USING OUR HSE SOFTWARE

SMAAT, our health, safety, environment and absenteeism (HSE) management software will enable you to significantly increase your efficiency. This intuitive system is so easy to use that it allows you to focus your efforts on prevention while providing you instant access to your most important data. Look no further, SMAAT translates into **Simplicity, Efficiency and Ingenuity!**

A man with dark hair and safety glasses is focused on his work, looking down at a piece of machinery. He is wearing a blue long-sleeved shirt. The background is slightly blurred, showing an industrial or workshop setting.

By purchasing a health, safety, environment and absenteeism management software, you will be able to solve a multitude of problems that face you on a daily basis. With an average of over 96 accidents per year per workplace the amount of reporting and analysis this entails, not mentioning the additional resources used is a significant drawback to everyday management. Using SMAAT will help your staff to implement profitable and successful preventive and corrective actions.

---

## PROBLEMS THAT CAN BE REMEDIED THROUGH SMAAT

- Lack of compliance to the various regulations
  - High number of dedicated resources
  - Difficulty to obtain statistics on HSE performance
  - Considerably complex and time consuming reporting processes
  - High number of accidents
  - Problematic progress tracking with involved managers
  - Almost impossible to follow-up with the corrective actions
  - Unaware of actual costs
  - Lack of knowledge of repetitive workplace injuries
  - Uneasy to fill out government forms
  - Workers' lack of implication and performance
  - No management system currently in place
  - Inability to effectively prioritize the cases
  - Lack of traceability of the HSE committee meetings (and others)
  - And many more...
-

# ESSENTIAL CHARACTERISTICS

## 01 STEP BY STEP ACCIDENT REPORTING

A complete module is dedicated to the event reporting. The employees will be guided through the process with clear and precise guidelines and customizable mandatory fields.

## 02 REAL-TIME STATISTICS

Have instant access to your overall HSE picture to evaluate and compare your situation by using the many detailed charts.

## 03 SIMPLIFY GOVERNMENTAL REPORTING

Save time and eliminate task duplication by using the integrated governmental forms allowing simplified reporting necessary to your organization.

#### 04 | **DELEGATE TASKS**

Identify the person responsible and the timeline for each case. Then activate the automated reminders to ensure a better management of the cases and of the corrective actions.

#### 05 | **COMPLIANCE TO APPLICABLE REGULATIONS**

SMAAT is designed for better understanding and utilization for the user. It will make it easier to comply to OHSAS and ISO as well as access all your documents that are now centralized on one platform.

#### 06 | **ACCESSIBILITY TO ALL**

Available in multiple languages and accessible on all platforms, regardless of your geographical location, SMAAT will become your corporate solution.

## 07 **EFFECTIVE ACCIDENT MANAGEMENT**

Increase your efficiency and ensure sound management of the accidents by clearly identifying the impacts and the corrective/preventive actions to be taken, allowing the best possible monitoring.

## 08 **COMPLETE HISTORY**

Access the accident history of each employee since the beginning of their employment with your company. This keeps all the history in one place and avoids multiple paper copies.

## 09 **COST MANAGEMENT**

Review and analyse all costs either by type of accident, by geographic location, by personal injury or by types of impact and draw your conclusions. You will then perform dynamic management by deploying action plans and reducing preventable expenses.

## **AN INVESTMENT THAT PAYS BIG!**

The sound management of your health, safety and environment with the SMAAT software will help reduce your yearly accident rate by about 25%. An average organization lists 96 incidents per year and the average cost per accident is 24,845\$ in damages and management. SMAAT allows you to make a significant return on investment in a very short time.

---

## **THE ADVANTAGES OF SMAAT**

- Centralize all your HSE tools and data on one platform
- Surpass safety regulations and requirements
- Considerably reduce your accident rate
- Exercise your due diligence
- Eliminate task duplication
- Increase the efficiency of your management processes
- Concentrate your actions in prevention
- Save time and dedicated resources
- Facilitate the governmental reporting
- Instantly review your overall HSE picture
- Analyse your data to prioritize your actions
- Sustain continuous improvement
- Obtain recognition from the professional environment

# ON THE CUTTING EDGE OF TECHNOLOGY

## SOFTWARE AS A SERVICE

Maerix offers software as an annual web rental which requires no purchase or installation of computer equipment on your part. This enables businesses of all shapes and sizes to get fast access to our solutions.

## THE SECURITY OF YOUR DATA

Maerix takes care of everything related to preservation and maintenance. We have elaborate monitoring systems to ensure continuity of service. We also have redundancy systems at every level, which in turn improves the reliability and recovery of your data.

## DATA ARCHIVES

When you acquire one of Maerix's software, you will still have access to the historical data that you have accumulated over the years. This way, you can easily gain access to statistics showing you, amongst other things, the big picture in terms of HSE.

## INTER-SYSTEM CONNECTIVITY

We put at your disposal connectivity APIs designed to communicate with any management tools already in place in your organization (when applicable). Our software can then become an addition to your planning ("ERP") such as SAP, PeopleSoft, Oracle, Taleo, Microsoft Dynamics, etc.

## PROGRAMMING LANGUAGE

Conceived by our team, our software are built from the best programming languages of the day, such as SQL, PHP, HTML and CSS. It allows us to have the most performant applications, as well as the most visually impeccable on the market.

## TECHNICAL REQUIREMENTS

To have access to our software, all you need is an internet connection and a browser. Our solutions are optimized for the latest version of all browsers such as: Internet Explorer (9 and later), Chrome, Firefox and Safari.

## FRAMEWORK

By designing and creating our software from beginning to end, Maerix is not restricted by a conceptual online purchased model (or template). Our programmers develop all the necessary code, from A to Z, for the deployment of our solutions. With all this, we can satisfy all your requirements using the latest technologies available on the market. Nothing can stop us!

# AN UNPARALLELED CUSTOMER SERVICE

**EMERGENCY SERVICE SUPPORT** Maerix offers a multilingual 24 hours, 7 days a week, 365 days a year support platform. If you have an unusual schedule, or any of your business units are on a different time zone, this service is for you.

**AVAILABLE TRAINING** Although our software is incredibly easy to use, we offer several types of training: administrative, supervision, users and upgrade. Our courses are given in your offices, ours or online, as needed.

**EASY AND HARMONIOUS TRANSITION** Whether you currently use a spreadsheet or an outdated system that no longer meets your needs, the transition to our solutions is easy and seamless! You will be operational with your all-new database in no time.

**ADVISORY SERVICES** To reduce resistance to change, and adapt to each and everyone's computer skills, Maerix also offers an advisory service. This service allows you to adapt training to small workgroups and make use of the software effectively in the context of your work environment, with direct relation to the everyday tasks of your participants. Our team of trainers will move within your organization as needed.

# **YOUR SEARCH ENDS HERE... ALL YOU NEED TO DO IS SAY YES!**

In conclusion, SMAAT is a health, safety, environment and absenteeism management software, designed to enable you to benefit from standardized and visually flawless reports increasing both efficiency and performance.

Forget about managing everything on paper and concentrate on avoiding fatal accidents that could cost you thousands of dollars.

As you can see, Maerix's multi-dimensional software answers all your needs. The next step is to give your approval to start implementation. Being simple, efficient and resourcefully ingenious, we will accompany you at every step. We're ready to help you enjoy the best management software, to enable you to increase your efficiency and performance as quickly as possible.
